

October 26, 2020

Dear Resident/Family Member/Loved One,

Pima County is currently at a Percent Positivity Rate of **5.1%** (Data from October 8th-21st on the CMS website) we are considered in the **Moderate Community Spread** category. See below for the different stages.

- a. **Minimal Community Spread** is defined as a Percent Positivity Rate of <5%
- b. **Moderate Community Spread** is defined as a Percent Positivity Rate of 5 to 10%
- c. **Substantial Community Spread** is defined as a Percent Positivity Rate of $\geq 10\%$

This means that we will be testing all staff weekly until further notice.

If you are a Designated Essential Visitor you must have a test that is within 1 week from today (10/26/2020), and it will need to be updated weekly until further notice.

***Please remember that you will be asked to leave if you are here past visiting hours of 8am-8:30pm. We need to ensure that there is availability for all resident's family members to visit.**

Thank you for your support. Please contact your social worker if you have any concerns.
